

On The Go Portable Water Softener 20" X 2.5" Pre-Carbon and Salt Dispenser

Kit Includes: 1 20" X 2.5" Clear Housing
1 20" X 2.5" Carbon Filter
1 20" X 2.5" Wall Mount Bracket
1 20" X 2.4" Wrench
8 Screws
1 Brass Inlet and Outlet With Cap and Plug
1 Special Distribution Tube
1 Hose

Carbon Filter: Perfect for the reduction of unwanted tastes and odors for all water softener applications, and a great job of protecting your unit by reducing chlorine and total organic compounds from the water source.

Flow Rate: 3 GPM

Salt Dispenser: Holds up to four 26oz boxes of common table salt or 6.5lbs of standard softener pellets. Allows you to regenerate the unit without putting it directly in the softener.

Price: \$89.99

On The Go Portable Water Softener 20" X 2.5" Pre-Carbon and Salt Dispenser Instructions

How To Add Salt:

- Step 1: Turn off water supply.
- Step 2: Unscrew 20" X 2.5" clear housing.
- Step 3: Remove carbon filter.
- Step 4: Insert regeneration distribution tube with the basket down.
- Step 5: Pour in table salt or pellet salt*.
- Step 6: Screw the clear housing onto the black head**.
- Step 7: Turn on the water supply.
- Step 8: When the regeneration process is complete remove the distribution tube, rinse out any remaining salt, insert the carbon filter and re assemble the unit.

*Do not pour salt into the distribution tube and keep the distribution in the center of the clear housing.

* **With the distribution tube in the center make sure it slips over the nipple in the bottom of the black head.
